

Lab 2.3 - Command Injection Vulnerabilities - Grepper

Deliverable 1. Try the application out and search for a string of interest.

Deliverable 2. Figure out how to run commands of your choosing. Provide a screenshot similar to the one below that shows your application output as well as commands you've snuck in.

Deliverable 3. Write a technical article on command injection. If you remember sec335, [shellshock](#) was an example of this type of vulnerability.
